

DESIGNING AN ERGONOMIC WORKSTATION

4 things to consider

Operator
Activities

1

Activities

Consider each of the tasks that will be undertaken by the operators.

Workstation
Performance

2

Performance

Consider the advantages and disadvantages of the current workstation system.

Operator
Failures

3

Failures

How will the operator fail?
How can you prevent operator failure?

System
Opportunities

4

Opportunities

What are the opportunities to optimise the system? What are the design opportunities?
